# CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

- 1. 1026-2005-0212, Log No. 05-14-031; Totten Minor Grading Plan
- Lead agency name and address:
   County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666
- 3. a. Contact: Terry Powers, Planner
  - b. Phone number: (858) 694-3754
  - c. E-mail: terence.powers@sdcounty.ca.gov.
- 4. Project location:

1673 Vista de Montemar in the Crest/Dehesa/Granite Hills, Harbison Canyon Community Planning area (APN 508-140-01).

Thomas Brothers Coordinates: Page 1252, Grid D/3

5. Project sponsor's name and address:

Pieter Totten 3078 Wittman Way San Diego, CA 92173

6. General Plan Designation

Density:

Community Plan: Crest-Dehesa, Lakeside
Land Use Designation: Estate Residential (17) &
Multiple Rural Use (18)

1 du/2, 4 acres and 1 du/4, 8 & 20 acres

respectively.

February 8, 2007

7. Zoning

Use Regulation: A70

Density: 1 du/4 acres

Special Area Regulation: None

8. Description of project (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off-site features necessary for its implementation):

The project proposes to grade 1,447 cubic yards for a 3,758 square-foot single-family residence with a 1,226 square-foot detached garage and 860 square-foot covered patio. The project also proposes a 980 square-foot second dwelling unit. The proposed project is located in the Pre-Approved Mitigation Area (PAMA) within the County's Multiple Species Conservation Program (MSCP) area. The subject 28.50 acre property is located at 1673 Vista de Montemar in the Crest/Dehesa/Granite Hills, Harbison Canyon Community Planning area.

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

The surrounding land uses consist of sparse single-family development mostly to the south and west. North and east of the parcel is land in preserve. The project site is relatively flat in the area proposed building, although the subject property contains steep to very steep slopes throughout the subject property. Coastal sage scrub vegetation dominates the landscape and there are many large rock outcroppings scattered throughout the property.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action
Minor Grading Permit
Grading Permit
Grading Permit Plan Change

Title

**ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:** The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages. ☐ Agriculture Resources ☐ Aesthetics ☐ Air Quality ☑ Biological Resources ☑ Cultural Resources Geology & Soils ☐ Hazards & Haz. ☐ Hydrology <u>& Water</u> Land Use & Planning Materials Quality ☐ Mineral Resources □ Noise Population & Housing ☑Transportation/Traffic ☐ Public Services Recreation ☐ Utilities & Service Mandatory Findings of Significance Systems **DETERMINATION:** (To be completed by the Lead Agency) On the basis of this initial evaluation: On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared. On the basis of this Initial Study, the Department of Planning and Land Use finds  $\square$ that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared. On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required. February 8, 2007 Signature Date

#### INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
  - a) The significance criteria or threshold, if any, used to evaluate each question; and
  - b) The mitigation measure identified, if any, to reduce the impact to less than significance

	Initial Study 005-0212, Log No. 05-14-031	- 5 -	February 8, 2007
	THETICS Would the project: Have a substantial adverse effe	ect on a scenic	vista?
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact
Discuss	sion/Explanation:		
valued highwa Terry P from a sproject develop residen visible f	viewsheds, including areas des ys or County designated visual lowers on September 6, 2005, s scenic vista and will not change site is located on slightly slopin oment to the north, east and we	signated as off resources. Bathe proposed per the compositing land facing sets of the site, cains undeveloped, the proposed	ased on a site visit completed by project is not located near or visible ion of an existing scenic vista. The southeast. There is sparse consisting of single-family ped. Further, the project site is not
,	Substantially damage scenic re outcroppings, and historic build		ding, but not limited to, trees, rock tate scenic highway?
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

**No Impact:** State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives notification from CalTrans that the highway has been designated as an official Scenic Highway. Based on a site visit completed by Terry Powers on September 6, 2005, the proposed project is not located near or visible within the same composite viewshed as a State scenic highway and will not change the visual composition of an existing scenic resource within a State scenic highway. Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The project site is located on the southwest facing slope of a remote area of Crest and will not be visible from nearby La Cresta Road nor will it be visible from and designated State scenic highway. Therefore, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

c)	Substantially degrade the existing visua surroundings?	l char	acter or quality of the site and its
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Less Than Significant Impact: Visual character is the objective composition of the visible landscape within a viewshed. Visual character is based on the organization of the pattern elements line, form, color, and texture. Visual character is commonly discussed in terms of dominance, scale, diversity and continuity. Visual quality is the viewer's perception of the visual environment and varies based on exposure, sensitivity and expectation of the viewers. The existing visual character and quality of the project site and surrounding can be characterized as a semi-rural, estate development. The immediate area is made up estate size lots at two acres and above, developed with custom built single-family residences and accessory structures. Also, inaccessible land in the surrounding area is undeveloped and exists in its natural state.

The project is compatible with the existing visual environment's visual character and quality for the following reasons: The site will be developed in accordance with the applicable development requirements with regards to height, setbacks and lot coverage. This will ensure the development will be reasonably consistent in bulk and scale to the existing structure, thus visually compatible.

The project will not result in cumulative impacts on visual character or quality because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the viewshed surrounding the project and will not contribute to a cumulative impact for the following reasons: The site will be developed in accordance with the applicable development requirements with regards to height, setbacks and lot coverage. This will ensure the development will be reasonably consistent in bulk and scale to the existing structure, thus visually compatible. Therefore, the project will not result in any adverse project or cumulative level effect on visual character or quality on-site or in the surrounding area.

d)	Create a new source of substantial lig day or nighttime views in the area?	ht or gla	re, which would adversely affect
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

**No Impact:** The project does not propose any use of outdoor lighting or building materials with highly reflective properties such as highly reflective glass or high-gloss surface colors. Therefore, the project will not create any new sources of light pollution that could contribute to skyglow, light trespass or glare and adversely affect day or nighttime views in area.

The project will not contribute to significant cumulative impacts on day or nighttime views because the project conforms to the Light Pollution Code. The Code was developed by the San Diego County Department of Planning and Land Use and Department of Public Works in cooperation with lighting engineers, astronomers, land use planners from San Diego Gas and Electric, Palomar and Mount Laguna observatories, and local community planning and sponsor groups to effectively address and minimize the impact of new sources light pollution on nighttime views. The standards in the Code are the result of this collaborative effort and establish an acceptable level for new lighting. Compliance with the Code is required prior to issuance of any building permit for any project. Mandatory compliance for all new building permits ensures that this project in combination with all past, present and future projects will not contribute to a cumulatively considerable impact. Therefore, compliance with the Code ensures that the project will not create a significant new source of substantial light or glare, which would adversely affect daytime or nighttime views in the area, on a project or cumulative level.

<u>II. AGRICULTURE RESOURCES</u> -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:

,	Convert Prime Farmland, Unique Farmla Importance Farmland), as shown on the Farmland Mapping and Monitoring Prog to non-agricultural use?	maps	prepared pursuant to the
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

**No Impact:** The project site does not contain any lands designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. In addition, the project does not contain Farmland of Local

pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. Therefore, no Prime Farmland, Unique Farmland, Farmland of Statewide, or Farmland of Local Importance will be converted to a non-agricultural use.

<u>III. AIR QUALITY</u> -- Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

a)	Conflict with or obstruct implemental Strategy (RAQS) or applicable port		0 0
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

?

Less Than Significant Impact: The project proposes development that was anticipated in SANDAG growth projections used in development of the RAQS and SIP. Operation of the project will not result in emissions of significant quantities of criteria pollutants listed in the California Ambient Air Quality Standards or toxic air contaminants as identified by the California Air Resources Board. As such, the proposed project is not expected to conflict with either the RAQS or the SIP. In addition, the project is consistent the SANDAG growth projections used in the RAQS and SIP, therefore, the project will not contribute to a cumulatively considerable impact.

b)	Violate any air quality standard or con projected air quality violation?	tribute s	substantially to an existing or
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	<b>☑</b>	Less than Significant Impact No Impact

## Discussion/Explanation:

In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

Less Than Significant Impact: The project proposes minor grading for a single-family residence and an accessory structure. The project proposes to cut 791 cubic yards of soil on site and importing 200 cubic yards of soil for a total earthwork quantity of 991 cubic yards. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In

addition, the vehicle trips generated from the project will result in 24 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

, ;	Result in a cumulatively considerable nowhich the project region is non-attainment ambient air quality standard (including requantitative thresholds for ozone precur	ent und eleasii	der an applicable federal or state ng emissions which exceed
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

## Discussion/Explanation:

San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O<sub>3</sub>). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM<sub>10</sub>) under the CAAQS. O<sub>3</sub> is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO<sub>x</sub>) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM<sub>10</sub> in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Less Than Significant Impact: Air quality emissions associated with the project include emissions of PM<sub>10</sub>, NO<sub>x</sub> and VOCs from construction/grading activities, as well as VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM<sub>10</sub> and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in 24 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM<sub>10</sub>.

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any  $O_3$  precursors.

d) Expose sensitive receptors to substantial pollutant concentrations?				
		Potentially Significant Impact		Less than Significant Impact

# **IV. BIOLOGICAL RESOURCES** -- Would the project:

 Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in

CEQA Initial Study	- 12	-
1026-2005-0212. Log No. 05-14-031		

February 8, 2007

local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

### Discussion/Explanation:

Less Than Significant Impact: Based on County records, staff field site visits and the Biological Letter Report prepared by REC Consultants dated August 4, 2005 and received August 9, 2006, the 28.5-acre site entirely consists of Coastal sage scrub. It previously burned in the October 2003 wildfires, but has recovered. One sensitive plant was observed on-site: San Diego sunflower (*Viguiera laciniata*)-County Group D sensitive species. Two narrow endemics are known to occur within the Crestridge ecological Reserve: Lakeside ceanothus (*Ceannothus cyaneus*) and San Diego thornmint (*Acanthomintha ilicifolia*) have been rated with a low potential to occur on-site. The Orange-throated whiptail was the only sensitive animal species observed on-site. However, several other animal species have the potential to occur on-site as there is suitable habitat on-site and they are known to occur in the area: reptiles such as the Silvery legless lizard, Coast horned lizard and Northern red rattlesnake; birds such as the Southern California rufous crowned sparrow and California gnatcatcher; and mammals such as the northwestern San Diego pocket mouse, San Diego black-tailed jack rabbit and mule deer.

There is a total of 3.0 acres of impact (2.8 acres on-site and 0.2 acres off-site) to Coastal sage scrub associated with the development of one single-family residence. Mitigation is proposed on-site at a ratio of 1.5:1 in accordance with BMO mitigation requirements for Tier II habitat. Thus, a 4.5-acre biological open space easement is proposed along the southern portion of the site. It is important to note that the remainder of the site that is not considered impacted, and is not within the proposed biological open space easement is considered avoided. That is, no other impacts nor development including the establishment of agriculture can take place without further CEQA review.

Therefore, staff has determined that although the site supports native biological habitat, the removal of 3.0 acres of habitat will not result in substantial adverse effects, either directly or through habitat modifications, to species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service for the following reasons: impact area has been designed to be as close as possible to the existing access road and existing development offsite to the northeast; conservation efforts include the preservation of 4.5 acres of Coastal sage scrub on-site connected to preserved lands to the east; the remainder of the site is considered avoided as no additional impacts can take place without further CEQA review; fencing is required adjacent to the proposed single-family residence thus separating the avoided habitat

from proposed development; and, no land disturbance will be permitted during the gnatcatcher breeding season. b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service? Potentially Significant Impact Less than Significant Impact Potentially Significant Unless No Impact Mitigation Incorporated Discussion/Explanation: Potentially Significant Unless Mitigation Incorporated: Based on County records, staff field site visits and the Biological Letter Report prepared by REC Consultants dated August 4, 2005 and received August 9, 2006 the 28.5-acre site entirely consists of Coastal sage scrub. There are no riparian habitats on-site and thus there will be substantial adverse effect on any riparian habitat. There is a total of 3.0 acres of impact (2.8 acres on-site and 0.2 acres off-site) to Coastal sage scrub associated with the development of one single-family residence. Mitigation is proposed on-site at a ratio of 1.5:1 in accordance with BMO mitigation requirements for Tier II habitat. Thus, any substantial effect on Coastal sage scrub, a sensitive natural community, has been mitigated to less than significant. c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? Potentially Significant Impact Less than Significant Impact

Discussion/Explanation:

Potentially Significant Unless

Mitigation Incorporated

**No Impact:** Based on County records, staff field site visits and the Biological Letter Report prepared by REC Consultants dated August 4, 2005 and received August 9, 2006, the project site does not contain any wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, stream, lake, river or water of the U.S., that could potentially be impacted through direct removal, filling, hydrological interruption, diversion or obstruction by the proposed development. Therefore, no impacts will occur to wetlands defined by Section 404 of the Clean Water Act in which the Army Corps of Engineers maintains jurisdiction over.

No Impact

Í	Interfere substantially with the moveme or wildlife species or with established n corridors, or impede the use of native w	ative r	esident or migratory wildlife
	Potentially Significant Impact		Less than Significant Impact
$\checkmark$	Potentially Significant Unless Mitigation Incorporated		No Impact

Potentially Significant Unless Mitigation Incorporated: The project through avoidance has conserved a large interconnecting block of habitat as only one single-family residence has been proposed. That is, there are impacts to 9.8% of the site, 15.8% has been preserved and 74.4% of the site has been avoided. Wildlife may continue to utilize the site and move through the site to preserve lands to the north and east. It is not expected that wide-ranging species are moving through or utilizing the site as the project site is at the very western edge of the Crestridge Ecological Preserve and there are residential uses to the west and south. The proposed pad is on a promontory, but there are other habitat features including ridges, valleys and promontories that are either preserved or avoided. Therefore, smaller mammals, reptiles and birds that are more likely to utilize the site should not be affected. Larger mammals can continue to move and utilize preserve lands within the Crestridge Ecological Reserve.

The regional linkage will not be affected by the project as the site is at the very eastern edge of the identified linkage. According to the Biological Letter Report prepared by REC Consultants dated August 4, 2005 and received August 9, 2006 only small and medium size mammals (as well as reptiles and birds) utilize the site. This use should not be affected by the proposed single-family residence development that will only impact 2.8 acres of the 28.5 acre site. The 2,638 acre Crestridge Ecological Reserve to the north and east of the project site will continue to accommodate travel for a wide range of wildlife species.

The width of the identified linkage will not essentially be impacted as a result of the project. That is, there are approximately 2, 600 acres of preserve land immediately adjacent to the site. To minimize any potential wildlife movement impacts the proposed development is situated as close as possible to another small development bubble that lies off-site to the northeast.

e) Conflict with the provisions of any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan or any other local policies or ordinances that protect biological resources?

,	Cause a substantial adverse cha esource pursuant to 15064.5?	nge in the siç	gnificance of an archaeological
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

**Less than Significant Impact:** Based on an analysis of County of San Diego archaeology resource files, archaeological records, maps, and aerial photographs by County of San Diego staff archaeologist, Gail Wright, it has been determined that portions of the subject property were previously surveyed for archaeological resources and were found to be negative. However, because there are other recoded sites in the

vicinity, the potential for buried cultural resources archaeological monitoring will be required as a condition of approval of this minor grading permit.

b)	Directly or indirectly destroy a unique geologic feature?	ue paleont	ological resource or site or unique
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: A review of the paleontological maps provided by the San Diego Museum of Natural History, combined with available data on San Diego County's geologic formations indicates that the project is located on geological formations that have high resource potential. High resource potential is assigned to geologic formations known to contain paleontological localities with rare, well-preserved, critical fossil materials for stratigraphic or paleoenvironmental interpretation, and fossils providing important information about the paleobiology and evolutionary history of animal and plant groups. In general, highly sensitive formations are considered to have the potential to produce vertebrate fossil remains.

However, it has been determined the project will have less than significant impact on paleontological resources because the project will not result in the permanent loss of paleontological information, because the project will not exceed the following excavation guidelines that indicate when a paleontological resource may be significantly impacted for areas with high resource potential:

- a) The total excavation associated with the project does not exceed 1,000 cubic yards and not any portion of such excavation exceeds 10 feet in depth into the geologic formation; or
- b) In situations where the geologic formation has been previously excavated and the total excavation associated with the project does not exceeds 1,000 cubic yards; or
- c) In situations where the project is located within 100 feet of a recorded fossil site and is within the same geologic formation as such site, the total excavation associated with the project is not more than 200 cubic yards and not any portion of such excavation exceeds 10 feet in depth.

The minimum graded cut depth of 10 feet is the approximate depth at which bedrock is unweathered and the depth at which unique paleontological resources can typically begin to be found. The excavation volume of 1,000 is based on an excavation with 10-foot x 10-foot footprint and a 10-foot depth. The excavation volume of 1,000 cubic yards was designed to address the patchy nature of many fossil occurrences and the observation that fossil discoveries increase in frequency with increasing volume of excavation. The excavation guidelines are based on discussions with City and County of San Diego staff

and professional opinions of paleontological experts from the San Diego Natural History Museum. Therefore, because the project will not exceed the excavation guidelines the project will not result in the permanent loss of significant paleontological information. Moreover, the project will not contribute to a cumulatively considerable loss of information, because all projects in the areas with high resource potential are required to have paleontological monitor during grading operations if these guidelines are exceeded.

Additionally, based on a site visit by Terry Powers on September 9, 2005, no known unique geologic features were identified on the property or in the immediate vicinity.

	ı F	Potentially Significant Impact Potentially Significant Unless ditigation Incorporated		Less than Significant Impact No Impact		
Discu	ssio	n/Explanation:				
Less Than Significant Impact: Based on an analysis of County of San Diego archaeology resource files, archaeological records, maps, and aerial photographs by County of San Diego staff archaeologist, Gail Wright, it has been determined that portions of the subject property were previously surveyed for archaeological resources and were found to be negative. However, because there are other recoded sites in the vicinity, the potential for buried cultural resources archaeological monitoring will be required as a condition of approval of this minor grading permit.						
<u>VI. G</u> a)	VI. GEOLOGY AND SOILS Would the project:  a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:					
	i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.					
	1 P	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

**No Impact:** The project is not located in a fault rupture hazard zone identified by the Alquist-Priolo Earthquake Fault Zoning Act, Special Publication 42, Revised 1997, Fault-Rupture Hazards Zones in California. Also, staff geologist Jim Bennett has

reviewed the project and has concluded that no other substantial evidence of recent (Holocene) fault activity is present within the project site. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known hazard zone as a result of this project.

ii. Strong seismic ground shaking?					
<ul><li>Potentially Significant Impact</li><li>Potentially Significant Unless</li><li>Mitigation Incorporated</li></ul>		Less than Significant Impact No Impact			
Discussion/Explanation:					
No Impact: The Uniform Building Code (UBC) and the California Building Code (CBC) classifies all San Diego County with the highest seismic zone criteria, Zone 4. However, the project is not located within 5 kilometers of the centerline of a known active-fault zone as defined within the Uniform Building Code's Maps of Known Active Fault Near-Source Zones in California. In addition, the project will have to conform to the Seismic Requirements Chapter 16 Section 162- Earthquake Design as outlined within the California Building Code. Section 162 requires a soils compaction report with proposed oundation recommendations to be approved by a County Structural Engineer before the issuance of a building or grading permit. Therefore, there will be no impact from the exposure of people or structures to potential adverse effects from strong seismic ground shaking as a result of this project.					
iii. Seismic-related ground failure, in	cludin	g liquefaction?			
<ul><li>Potentially Significant Impact</li><li>Potentially Significant Unless</li><li>Mitigation Incorporated</li></ul>		Less than Significant Impact No Impact			
Discussion/Explanation:					
<b>No Impact:</b> The geology of the project site is identified as Upper Jurassic and Lower Cretaceous Marine and Non-marine. This geologic environment is not susceptible to ground failure from seismic activity. In addition, the site is not underlain by poor artificial ill or located within a floodplain. Therefore, there will be no impact from the exposure of people to adverse effects from a known area susceptible to ground failure.					
iv. Landslides?					
<ul><li>Potentially Significant Impact</li><li>Potentially Significant Unless Mitigation Incorporated</li></ul>		Less than Significant Impact No Impact			

collapse?

☐ Potentially Significant Impact

	Potentially Significant Impact	$\checkmark$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact
Discus	sion/Explanation:		

**Less Than Significant Impact:** The project proposes to discharge domestic waste to on-site wastewater systems (OSWS), also known as septic systems. The project involves one septic tank and leech field located The project involves a standard below ground septic tank with 100% reserve leech field to the north of the dwelling units. Discharged wastewater must conform to the Regional Water Quality Control Board's (RWQCB) applicable standards, including the Regional Basin Plan and the California Water Code. California Water Code Section 13282 allows RWQCBs to authorize a local public agency to issue permits for OSWS "to ensure that systems are adequately designed, located, sized, spaced, constructed and maintained." The RWQCBs with jurisdiction over San Diego County have authorized the County of San Diego, Department of Environmental Health (DEH) to issue certain OSWS permits throughout the County and within the incorporated cities. DEH has reviewed the OSWS lay-out for the project pursuant to DEH, Land and Water Quality Division's, "On-site Wastewater Systems: Permitting Process and Design Criteria." The project will be conditioned to have DEH approve the project's OSWS prior to grading. Therefore, the project has soils capable of adequately supporting the use of septic tanks or alternative wastewater disposal systems as determined by the authorized, local public agency. In addition, the

<b>O</b> /	Impair implementation of or physically in response plan or emergency evacuation	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

February 8, 2007

- 23 -

Discussion/Explanation:

CEQA Initial Study

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

i. OPERATIONAL AREA EMERGENCY PLAN:

**Less Than Significant Impact:** The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

**No Impact:** The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

**No Impact:** The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

**No Impact:** The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

**No Impact:** The Dam Evacuation Plan will not be interfered with because the project is located outside a dam inundation zone.

properties. Therefore, the project will not substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies.

	, , ,		•			
	VIII. HYDROLOGY AND WATER QUALITY Would the project: a) Violate any waste discharge requirements?					
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact			
Discussi	on/Explanation:					
<b>No Impact</b> : The project does not propose waste discharges that require waste discharge requirement permits, NPDES permits, or water quality certification from the San Diego Regional Water Quality Control Board (SDRWQCB). In addition, the project does not propose any known sources of polluted runoff or land use activities that would require special site design considerations, source control Best Management Practices (BMPs) or treatment control BMPs, under the San Diego Municipal Storm Water Permit (SDRWQCB Order No. 2001-01).						
b) Is the project tributary to an already impaired water body, as listed on the Clean Water Act Section 303(d) list? If so, could the project result in an increase in any pollutant for which the water body is already impaired?						
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact			
Diccucci	on/Evalanation:					

Discussion/Explanation:

**No Impact:** The project lies in the El Cajon hydrologic subarea, within the San Diego hydrologic unit. According to the Clean Water Act Section 303(d) list, July 2003, portion of this watershed at the Pacific Ocean and mouth of the San Diego River is impaired for coliform bacteria. Constituents of concern in the San Diego watershed include coliform bacteria, total dissolved solids, nutrients, petroleum chemicals, toxics, and trash. However, the project does not propose any known sources of pollutants, or land use activities that might contribute these pollutants.

c) Could the proposed project cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses?

nitial Study 005-0212, Log No. 05-14-031	- 26 -		February 8, 200
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	_	<b></b> ✓	Less than Significant Impact No Impact

**Less Than Significant Impact:** The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

The project lies in the El Cajon hydrologic subarea, within the San Diego hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply, industrial service supply; hydropower generation; contact water recreation; non-contact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; commercial and sport fishing; estuarine habitat; marine habitat; migration of aquatic organisms; shellfish harvesting; and, rare, threatened, or endangered species habitat.

The project proposes potential sources of polluted runoff during construction, which may include: equipment, materials and waste storage. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed to reduce potential pollutants in runoff to the maximum extent practicable, such that the proposed project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: the project utilizes site design to minimize the potential for polluted runoff by directing the flow of runoff onto vegetated areas of the site. In addition, the project obtained approval from the Department of Environmental Health for the use of a septic system to handle on-site waste disposal, which will further ensure the protection of existing and potential beneficial uses of the receiving waters.

In addition, the proposed BMPs are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

**No Impact:** The project does not involve construction of new or expanded development that could alter the drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site. The project site is completely developed and proposed project will not alter the existing natural topography, vegetation, or drainage courses on-site or off-site.

No Impact

Less than Significant Impact

property is located at 1673 Vista de Montemar in the Crest/Dehesa/Granite Hills, Harbison Canyon Community Planning area. The project does not propose the introduction of new infrastructure such as major roadways or water supply systems, or utilities to the area. The project complies with the Zoning Ordinance, General Plan and Regional Land Use Plan. The proposed residence is an anticipated use of the subject property and surrounding properties. Therefore, the proposed project will not significantly disrupt or divide the established community.

significantly disrupt or divide the established community.			
<ul> <li>X. MINERAL RESOURCES Would the project:</li> <li>a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?</li> </ul>			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
Less Than Significant Impact: Although the project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate Materials in the Western San Diego Production-Consumption Region, 1997) as an area of undetermined mineral resources MRZ-3, the DPLU staff geologist has reviewed the site's geologic environment and has determined that the site is not located within an alluvial river valley or underlain by coastal marine/non-marine granular deposits. Therefore, no potentially significant loss of availability of a known mineral resource of value to the region and the residents of the state will occur as a result of this project. Moreover, if the resources are not considered significant mineral deposits, loss of these resources cannot contribute to a potentially significant cumulative impact.			
Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

**No Impact:** The project site is zoned A70, which is not considered to be an Extractive Use Zone (S82) nor does it have an Impact Sensitive Land Use Designation (24) with an Extractive Land Use Overlay (25) (County Land Use Element, 2000).

# XI. NOISE -- Would the project result in:

<u>/\ii</u>	Would the project result in.	
a)	Exposure of persons to or generation established in the local general plan of other agencies?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

February 8, 2007

Discussion/Explanation:

Less Than Significant Impact: The project proposes a minor grading permit for the purposes of developing a single-family residence and second dwelling unit and will be occupied by residents. Based on a site visit completed by Terry Powers on September 6, 2005, the surrounding area supports rural housing and is occupied by residents. The project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons:

#### General Plan – Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive areas to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A), modifications must be made to the project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute. Project implementation is not expected to expose existing or planned noise sensitive areas to road, airport, heliport, railroad, industrial or other noise in excess of the CNEL 60 dB(A). This is based on staff's review of projected County noise contour maps (CNEL 60 dB(A) contours) and/or review by County Noise Specialist John Bennett on September 7, 2005. Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b **and/or** Ramona Community Plan) and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

c)	A substantial permanent increase above levels existing without the p		noise levels in the project vicinity
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
DISCUS	ssion/Explanation:		

**Less Than Significant Impact:** The project involves permanent residences, which qualify as permanent noise sources that may increase the ambient noise level. As indicated in the response listed under Section XI, Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels based on review of the project by County staff. Studies completed by the Organization of Industry Standards (ISO 362; ISO 1996 1-3; ISO 3095; and ISO 3740-3747) state an

increase of 10 dB is perceived as twice as loud and is perceived as a significant increase in the ambient noise level.

The project will not result in cumulatively noise impacts because a list of past, present and future projects within in the vicinity were evaluated. It was determined that the project in combination with a list of past, present and future project would not expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

of the p	projects considered.			
	d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			
Less Than Significant Impact: The project does not involve any uses that may create substantial temporary or periodic increases in ambient noise levels in the project vicinity including but not limited to extractive industry; outdoor commercial or industrial uses that involve crushing, cutting, drilling, grinding, or blasting of raw materials; truck depots, transfer stations or delivery areas; or outdoor sound systems.  Also, general construction noise is not expected to exceed the construction noise limits of the County of San Diego Noise Ordinance (Section 36-410), which are derived from State regulations to address human health and quality of life concerns. Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of 75 dB for more than an 8 hours during a 24-hour period. Therefore, the				
	would not result in a substantial tempora t noise levels in the project vicinity.	ary or	periodic increase in existing

XIII. PUBLIC SERVICES  a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance service ratios, response times or other performance objectives for any of the public services:			
i			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

**No Impact:** The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

# XIV. RECREATION

a) Would the project increase the use of existing neighborhood and regional or other recreational facilities such that substantial physical deterioration of facility would occur or be accelerated?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

**Less Than Significant Impact:** The project involves the construction a single-family residence that will increase the use of existing neighborhood and regional parks or other recreational facilities. To avoid substantial physical deterioration of local recreation facilities the project will be required to pay fees or dedicate land for local parks to the County pursuant to the Park Land Dedication Ordinance (PLDO). The Park Land Dedication Ordinance (PLDO) is the mechanism that enables the funding or dedication of local parkland in the County. The PLDO establishes several methods by which developers may satisfy their park requirements. Options include the payment of park fees, the dedication of a public park, the provision of private recreational facilities, or a combination of these methods. PLDO funds must be used for the acquisition, planning, and development of local parkland and recreation facilities. Local parks are intended to serve the recreational needs of the communities in which they are located. The proposed project opted to pay park fees as applicable in the building permit phase. Therefore, the project meets the requirements set forth by the PLDO for adequate parkland dedication and thereby reducing impacts, including cumulative impacts to local recreational facilities. The project will not result in significant cumulative impacts, because all past, present and future residential projects are required to comply with the requirements of PLDO. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

There is an existing surplus of County Regional Parks. Currently, there is over 21,765 acres of regional parkland owned by the County, which far exceeds the General Plan standard of 15 acres per 1,000 population. In addition, there are over one million acres of publicly owned land in San Diego County dedicated to parks or open space including Federal lands, State Parks, special districts, and regional river parks. Due to the extensive surplus of existing publicly owned lands that can be used for recreation the project will not result in substantial physical deterioration of regional recreational facilities or

accelerate the deterioration of regional parkland. Moreover, the project will not result any cumulatively considerable deterioration or accelerated deterioration of regional recreation facilities because even with all past, present and future residential projects a significant surplus of regional recreational facilities will remain.

b)	Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effeon the environment?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	ssion/Explanation:		
<b>No Impact:</b> The project does not include recreational facilities or require the construction or expansion of recreational facilities. Therefore, the construction or expansion of recreational facilities cannot have an adverse physical effect on the environment.			
<b>XV. T</b> a)	RANSPORTATION/TRAFFIC Would to Cause an increase in traffic which is subload and capacity of the street system (in either the number of vehicle trips, the vocangestion at intersections)?	stanti .e., re	al in relation to the existing traffic sult in a substantial increase in
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

The proposed project will result in an additional 24 ADT. The project was reviewed by County staff and was determined not to result in a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons: The surrounding roads currently operate at an acceptable level and have the ability to handle this increase to capacity. Therefore, the project will not have a significant direct project impact on traffic volume, which is considered substantial in relation to existing traffic load and capacity of the street system. Also refer to the answer for XV. b. below.

The County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential

cumulative impacts caused by traffic from future development. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway build out over the next 30 years, will use funds from TransNet, state, and federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project will potentially generate 24 ADT. These trips will be distributed on circulation element roadways in the unincorporated county that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant. In order to mitigate its incremental contribution to significant cumulative traffic impacts, the TIF program fee will be paid prior to obtaining building permits for this project.

,	Exceed, either individually or cumulative established by the County congestion moby the County of San Diego Transportatoroads or highways?	anage	ement agency and/or as identified
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant: The proposed project will result in an additional 12 ADT. The project was reviewed by County staff and was determined not to exceed a level of service (LOS) standard at the direct project level because the surrounding roads currently operate at an acceptable level and have the ability to handle this increase to capacity. Therefore, the project will not have a significant direct project-level impact on the LOS standards established by the County congestion management agency for designated roads or highways.

However, the County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. This program is based on a summary of projections method contained in an adopted planning document, as referenced in the State CEQA Guidelines Section 15130 (b)(1)(B), which evaluates regional or area wide conditions contributing to cumulative transportation impacts. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway build out over the next 30 years, will use funds from TransNet, state, and federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project may generate about 24 ADT. These trips will be distributed on circulation element roadways in the unincorporated county that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant. In order to mitigate the project's incremental contribution to significant cumulative traffic impacts, the TIF fee will have to be paid prior to obtaining building permits.

c)	Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

**No Impact:** The proposed project is located outside of an Airport Master Plan Zone and is not adjacent to any public or private airports; therefore, the project will not result in a change in air traffic patterns.

f)	Result in inadequate parking capacity?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discu	ussion/Explanation:				
<b>Less Than Significant Impact:</b> The Zoning Ordinance Section 6766 Parking Schedule requires provision for on-site parking spaces. The project is consistent with the Ordinance for total parking requirements; therefore, the proposed project will not result in insufficient parking capacity.					
g)	Conflict with adopted policies, plans, or transportation (e.g., bus turnouts, bicycl				
	Potentially Significant Impact	$\checkmark$	Less than Significant Impact		
	Potentially Significant Unless Mitigation Incorporated		No Impact		

Discussion/Explanation:

**Less Than Significant:** The project does not propose any hazards or barriers for pedestrians or bicyclists. Any required improvements will be constructed to maintain existing conditions as it relates to pedestrians and bicyclists.

a) Exceed	S AND SERVICE SYSTEMS wastewater treatment require Control Board?	the project: f the applicable Regional Water
Poter	tially Significant Impact tially Significant Unless tion Incorporated planation:	Less than Significant Impact No Impact

**Less Than Significant Impact:** The project proposes to discharge domestic waste to on-site wastewater systems (OSWS), also known as septic systems. The project involves a standard, subsurface septic system located to the north of the building pads. Discharged wastewater must conform to the Regional Water Quality Control Board's (RWQCB) applicable standards, including the Regional Basin Plan and the California Water Code. California Water Code Section 13282 allows RWQCBs to authorize a local public agency to issue permits for OSWS "to ensure that systems are adequately designed, located, sized, spaced, constructed and maintained." The RWQCBs with jurisdiction over San Diego County have authorized the County of San Diego, Department of Environmental Health (DEH) to issue certain OSWS permits throughout the County and within the incorporated cities. DEH has reviewed the OSWS lay-out for the project pursuant to DEH, Land and Water Quality Division's, "On-site Wastewater Systems: Permitting Process and Design Criteria." Prior to the final approval of the Minor Grading permit, DEH will give final approval of the project's OSWS. Therefore, the project is consistent with the wastewater treatment requirements of the RWQCB as determined by the authorized, local public agency.

b)	f	Require or result in the construction of new water or wastewater treatmer facilities or expansion of existing facilities, the construction of which could significant environmental effects?			
		Potentially Significant Impact		Less than Significant Impact	
		Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact	

Discussion/Explanation:

**No Impact:** The project does not include new or expanded water or wastewater treatment facilities. In addition, the project does not require the construction or expansion of water or wastewater treatment facilities. Therefore, the project will not require any construction of new or expanded facilities, which could cause significant environmental effects.

c)	Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discu	ssion/Explanation:			
<b>No Impact:</b> The project does not include new or expanded storm water drainage facilities. Moreover, the project involves landform modification and requires source, treatment or structural Best Management Practices for storm water through the Building Permit and Minor Grading Permit processes. Therefore, the project will not require any construction of new or expanded facilities, which could cause significant environmental effects.				
d)	Have sufficient water supplies available entitlements and resources, or are new		• •	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

**No Impact:** The proposed project does not involve or require water services from a water district. The project is for a single-family dwelling unit and second dwelling unit that will rely on a well for groundwater. The applicant is required to obtain a well permit associated with the proposed buildings by the Department of Environmental Health prior to approval of the grading permit.

e) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

	Initial Study - 005-0212, Log No. 05-14-031	44 -	February 8, 2007

<b>O</b> /	Comply with federal, state, and lewaste?	ocal statutes	and regulations related to solid	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				

**Less than Significant Impact:** Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). The project will deposit all solid waste at a permitted solid waste facility and therefore, will comply with Federal, State, and local statutes and regulations related to solid waste.

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

# Discussion/Explanation:

# FOR ALL RESPONSES

The following list of past, present and future projects were considered and evaluated as a part of this Initial Study:

PROJECT NAME	PERMIT/MAP NUMBER		
Bursztyn TPM	TPM 20840		
Price TPM	TPM 20762		
G. A. Development TPM	TPM 20775		
Hernandez TPM	TPM 20544		

Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to Biological and Archaeological Resources. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. Prior to approval of Grading Permits or any other permit, the applicant shall implement a grading monitoring and data recovery program to mitigate potential impacts to undiscovered buried archaeological resources on the Totten SFR Project, Log No. 05-14-013 to the satisfaction of the Planning Director. In addition, there is a total of 3.0 acres of impact (2.8 acres on-site and 0.2 acres off-site) to Coastal sage scrub associated with the development of one single-family residence. Mitigation is proposed on-site at a ratio of 1.5:1 in accordance with BMO mitigation requirements for Tier II habitat. Thus, a 4.5 acre biological open space easement is proposed along the southern portion of the site. It is important to note that the remainder of the site that is not considered impacted, and is not within the proposed biological open space easement is considered avoided. That is, no other impacts nor development including the establishment of agriculture can take place without further CEQA review. Therefore, through avoidance of 21.2 acres of the site and mitigation through the dedication of a 4.5 acre biological open space easement, it has been found that after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

,	Does the project have environmental exadverse effects on human beings, either	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

# Discussion/Explanation:

In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population

and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there is no substantial evidence that there are adverse effects on human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
